Verified Contract address

Executive Summary

Infinity Robot Token (IFNTBT) is a utility token designed to power an AI-assisted trading ecosystem that emphasizes discipline, risk management, and community governance. IFNTBT aligns incentives between the protocol, developers, and holders through deflationary mechanics, staking utilities, and transparent tokenomics.

Problem & Opportunity

Retail traders face emotional biases, inconsistent signals, and fragmented tooling. Markets run 24/7; human traders can't. There is a need for automated, trustworthy systems that translate high-quality data into disciplined execution.

Solution & Architecture

IFNTBT provides a modular stack: signal generation (AI models), risk management layers (position sizing, stop rules), and optional execution modules that users can opt into. The stack is accessible via subscription paid in IFNTBT or via staking tiers.

Key modules: Signals, Risk, Automation, Telemetry (analytics).

Utility & Use Cases

- Subscription payments for AI trading modules (paid in IFNTBT)
- Staking to unlock tiered features, fee discounts, and early access
- Governance proposals and votes via token-weighted DAO
- Integration discounts in NFT mints and partner GameFi platforms

Roadmap

- Phase 1 — Token creation, website launch, initial community growth
- Phase 2 — DEX/CEX listings, staking module, analytics dashboard (beta)
- Phase 3 — AI Trading Bot (beta), API connectors, strategy marketplace
- Phase 4 — Public automation suite, NFT/GameFi integrations, mobile app

This is the heading

- ✅ Website & whitepaper launch
- ✅ Smart contract development
- ✅ Community building & early supporters
- ✅ Token listing on DEX

Phase - 1

Token Lanuch

Phase - 2

Exchange Listing

⊙ Building Momentum

- 🔵 Strategic partnerships & collaborations
- 🔵 Initial marketing campaigns
- 🔵 Listing on Tier-2 CEX exchanges
- 🔵 Community reward programs

☆ Expanding Reach

- 🟠 AI-powered trading tools release
- 🟠 Advanced staking & rewards system
- 🟠 Governance model introduction
- 🟠 Wider adoption through integrations

Phase - 3

AI Trading Bot Beta

Phase - 4

🏆 Full Ecosystem

NFT/GameFi Expansion

🔴 Major CEX listings

🔴 Launch of Infinity Robot AI Trading Platform

🔴 Expansion into global partnerships

🔴 Ecosystem growth with NFTs, gaming & DeFi utilities

Smart Contract & Security

Network: Polygon

Contract Address: 0x9b9C9d5656310598e371DF1e4cc39a09f1a2683d

✅ Open-source contract with verified source on block explorer

✅ Independent security audit (Certik / TechRate / SolidProof) — link to report

✅ Liquidity locking and treasury multi-sig governance

Community & Governance

IFNTBT holders will be able to propose and vote on protocol parameters including staking rewards, burn schedule adjustments, and feature prioritization. Voting power is proportional to stake, with additional weight for long-term lockups.
